STUDENT SESSIONS

Ag Skills Hands-on Sessions

Title and Presenter	Description
<p>AI and Cattle and Pigs Heartland Community College</p>	<p>Try your hand—literally—at practicing artificial insemination in cattle and pigs while learning about the fascinating and in-demand career paths within animal breeding and livestock reproduction.</p>
<p>From Seed to Success WYFFELS</p>	<p>Get hands-on with seedling germination and seed identification—key skills in the field of seed quality testing and plant science careers.</p>
<p>Agronomy Escape Room Heartland Community College</p>	<p>Put your problem-solving skills to the test in this agronomy-themed escape room! Work through puzzles and riddles related to crops and soils to see if your team can beat the clock.</p>
<p>Ag in the Classroom Livingston Farm Bureau</p>	<p>Remember all of those fun activities you used to do in Elementary school when Ag in the Classroom would come visit? Come hear from two presenters and learn some activities that you can take back to your own schools!</p>
<p>Drones Heartland Community College</p>	<p>Explore the rapidly evolving world of drone technology in agriculture. Learn how drones are used today and what skills you'll need to pursue a career in this exciting, high-tech field.</p>
<p>Engineering in Agriculture Maurer-Stutz, Inc.</p>	<p>In this workshop, student will learn about different types of engineering in agriculture. In addition, try you hand at putting together plans and building a structure - with constraints and client needs.</p>
<p>Getting the Scholarship IAVAT</p>	<p>Learn how to prepare for scholarship interviews, what selection committees are really looking for, and how to set yourself apart from other applicants with confidence and clarity.</p>
